Professional Summary

Software Engineering graduate with hands-on experience in System Analysis, Requirements Engineering, Business Process Analysis, and Application Development through a Business Analyst internship and multiple software projects. Skilled in gathering user requirements, preparing BRS, SRS, and RTM documentation, designing Workflow functional diagrams and data models, and developing database-driven applications using Laravel, Django, and MySQL.

Work Experience

Business Analyst Intern — **Deanship of Information Technology, UQU University** — **Aug 2025–Dec 2025**
Analysis team — Makkah, Saudi Arabia

- gathered and analyzed business and system requirements.
- Prepared 3 documents: Business Requirements Specifications (BRS), Software Requirements Specifications (SRS), and Requirements Traceability Matrices (RTM)
- Designed process workflows, use cases, activity diagrams, and UML models and Entity Relationship Diagrams (ERD) to support system analysis and database design.

Education

- **B.Sc. Software Engineering,** Umm Al-Qura University.

  2022–2026

  - **First Class Honor** with **GPA** 3.94 of 4
  - Active member of the UQU **Computing Club** and **IEEE UQU** Student Branch, contributing to technical initiatives, and community events.

Certifications and Courses

- Artificial Intelligence Program — Link
  Samsung Innovation Campus SIC - Jul 2025 - Sep 2025
- Building Web Applications with Django — Link
  Tuwaiq Academy - April 2025
- Intro to Machine Learning — Link
  Kaggle - Aug 2025

Technologies and Languages

- **System Analysis**: Requirements Gathering and Analysis, Business Process Analysis, Workflow Design, Critical thinking
- **Documentation**: BRS, SRS, RTM, UML Diagrams, ERD, Process Modeling, BPMN
- **Languages**:Java, PHP, Python, Javascript,
- **Technologies & Frameworks**: Laravel PHP, Django, Flutter, Bootstrap 5, MySQL, SQLite, AWS Fundamentals, Git, GitHub, Render, Postman, Figma
- **Other**: Data structures and algorithms, ML, AI prompt engineering, critical thinking

Projects

- **Murtad: Smart Transportation Management System** (Graduation Project) — May 2025 - Jun 2026 (Poster)

  Technologies: Laravel, AWS, MySQL, Mapbox API, Postman, Jira, Documentation.
  Contributed to requirements analysis, database development, workflow design, application development, and deployment activities. Developed RESTful APIs and backend services using Laravel and MySQL and documented it by Postman and integrate and deployed backend code to the AWS EC2 instance. Designed database structures and developed backend APIs for transportation service providers, implemented the Solution of geographic clustering for automatic trip assignment based on location and academic schedules of the subscribed students. Integrated real-time vehicle tracking using Mapbox services.

- **SmartED – Emergency Department Optimizer** — Aug 2025 – Sep 2025 (GitHub)

  Technologies: Python, Machine Learning, Deep Learning, Documentation.
  Contributed to project planning, model development, training, and performance evaluation activities for emergency department demand forecasting. Developed as part of Samsung Innovation Campus AI course

- **Django Portfolio Application** — Apr 2025 (GitHub - Live website)

  Technologies: Python, Django, MySQL, HTML, JavaScript, Bootstrap.
  Developed a dynamic portfolio website using Django and MariaDB. Developed as part of the Tuwaiq Academy Django Bootcamp. Implemented a dynamic blog module with article management

Languages

- **Arabic**
- **English**

Leadership & Volunteering

- **IEEE UQU** – Vice Chair of the Media Committee after being Organizer Member — Aug 2024 – May 2026
- **IEEEXtreme 18.0 Saudi Arabia** – Student Volunteer (30 volunteer hours) — Sep 2024 – Oct 2024
- **UQU Computing Club** – Scientific Committee Member (Recognized as Member of the Month) — Feb 2024 – Jan 2026
- **Health Volunteering Platform** – UI Design Volunteer (40 Volunteer Hours) — Nov 2024
